

## Project Summary

### By Samuel Yoon

My project is a website built for my brother James! He is eight years old and is obsessed with the Nintendo Switch and I've been giving him different video games for the past two years on his birthday and Christmas. I wanted to build a website that explained a few favorite things about James' favorite video games. I know that when he sees the website he would be really proud of it!

- I included everything listed from bullet 1-10.
- In addition to that, I added a form and confirmation page
- I also added a Responsive Web Design for a mobile device for a few of my pages.
